

Interventions

FDM Pathway Project
Maggie Beckstrand, MPH

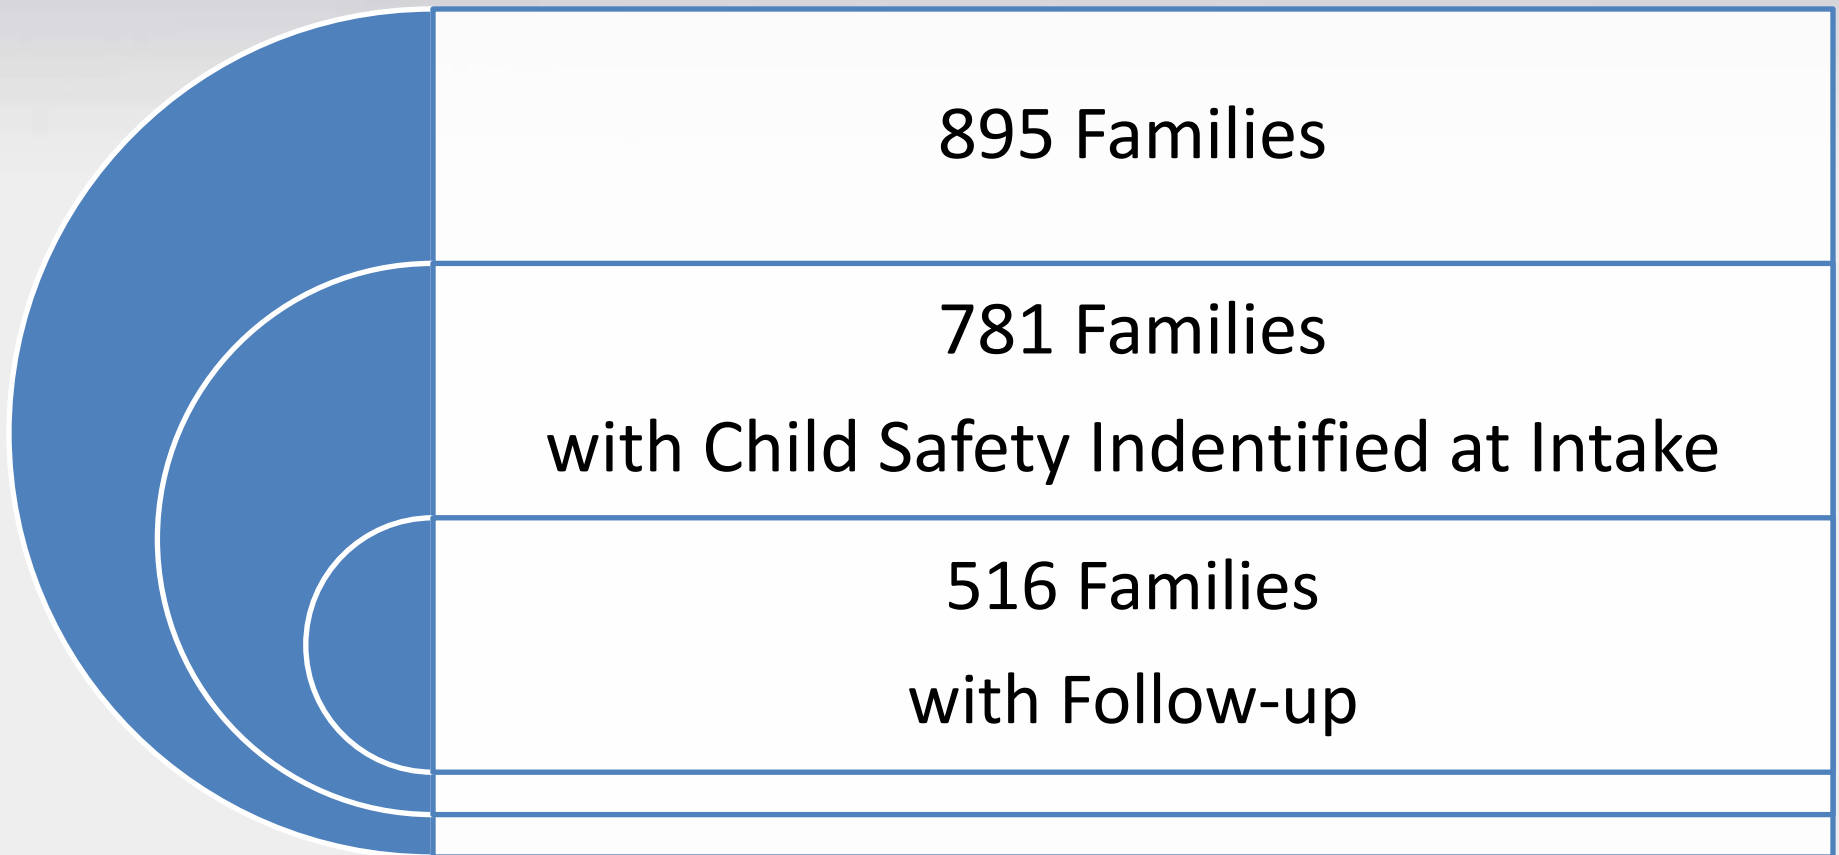

How many intervention have been collected?

FDM Category	Interventions (n)	Families (n)
Basic Needs	3479	1704
Access to Services	3063	1563
Child Safety	1677	895
Parent/Child Relationships	1360	656
Life Value	1277	733
Family Communication	1090	616
Shelter	913	623
Social Emotional Health	857	536
Children's Physical/Mental Health	833	436
Substance Abuse	353	213

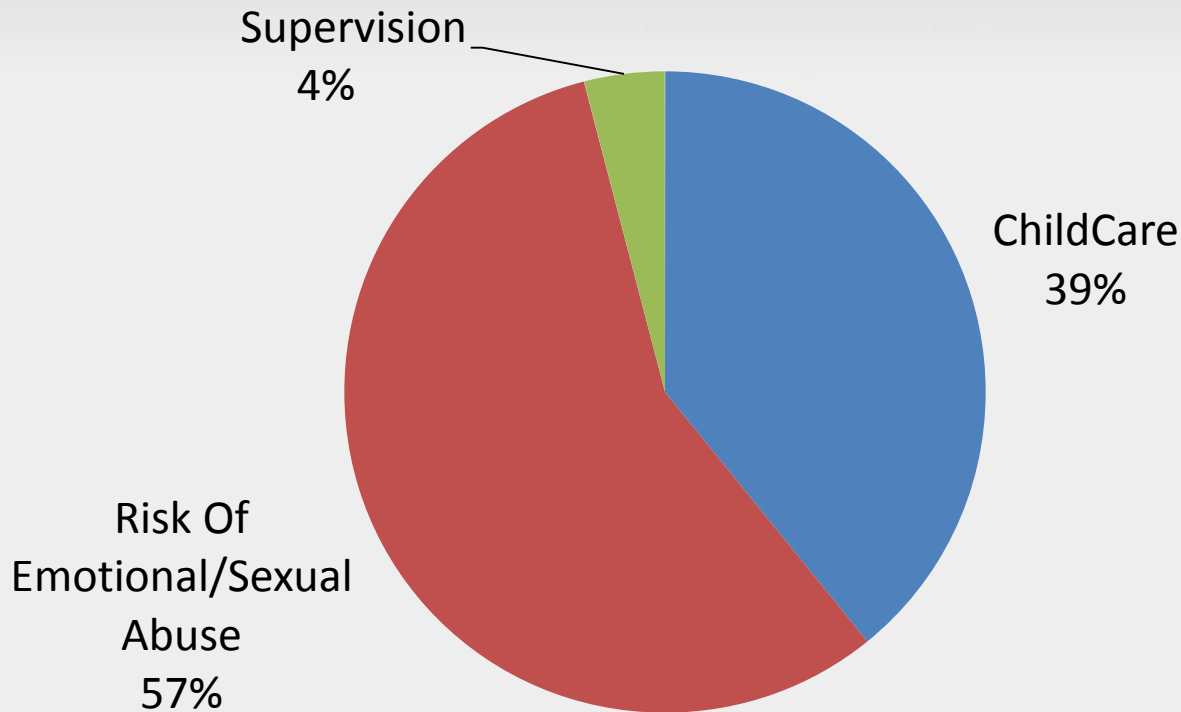

Example From Matrix

<i>FDM Categories</i>	<i>Family Development Matrix Indicators</i>	<i>Pathway Interventions</i>
<i>Child Safety</i>	Child Care Supervision Risk of Emotional & Sexual Abuse	Confirm safety of child, Work in partnership with Child Welfare, Connect to childcare opportunities

Interventions for Child Safety

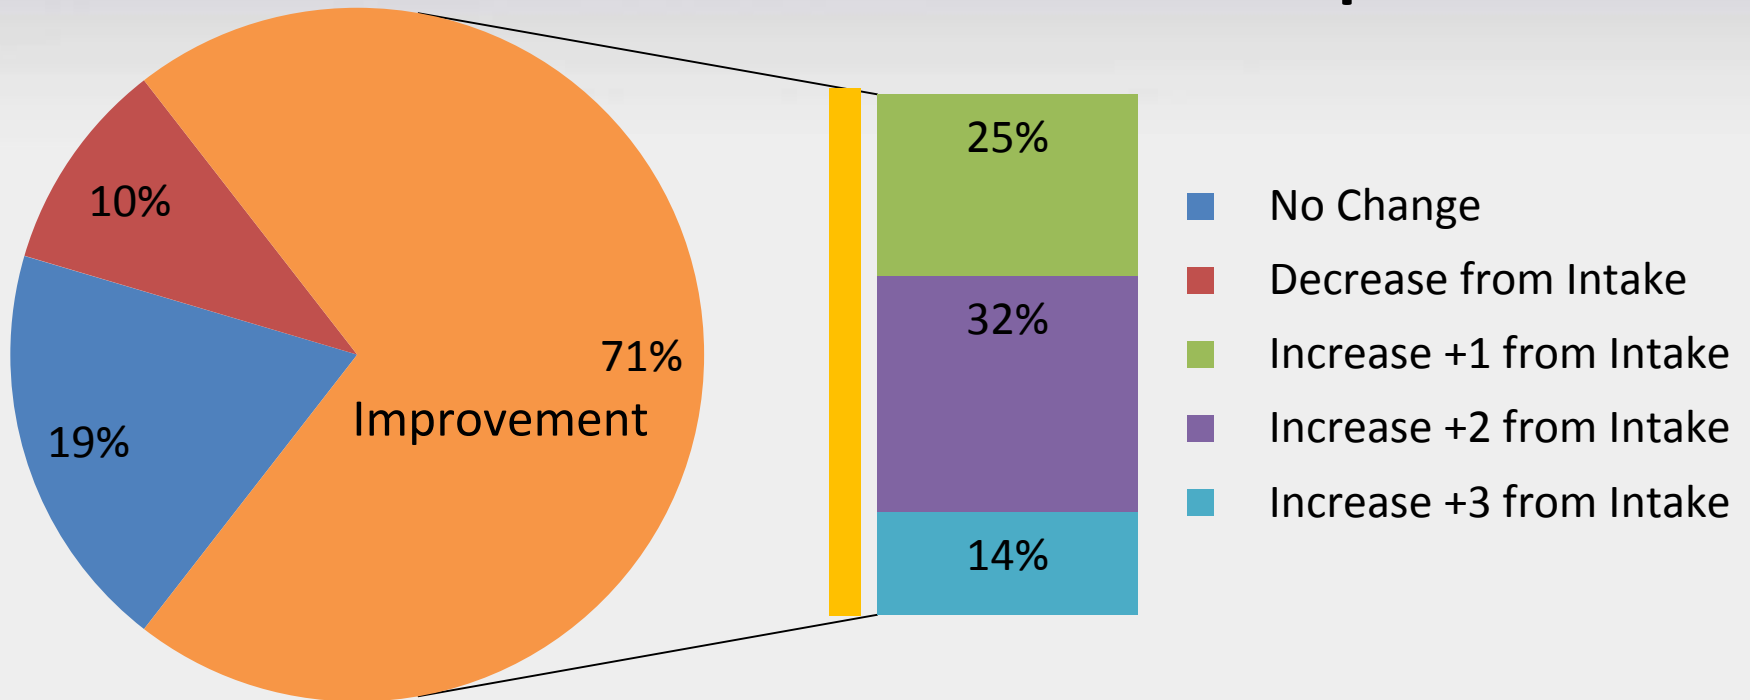

What indicators were targeted with interventions? (N=516)

What were the indicator scores at intake?

Intake Score	n	%
1	186	36.0
2	249	48.3
3	63	12.2
4	18	3.5

What change was seen from intake to last follow-up?

Child Safety

Families who scored 1 or 2 at intake

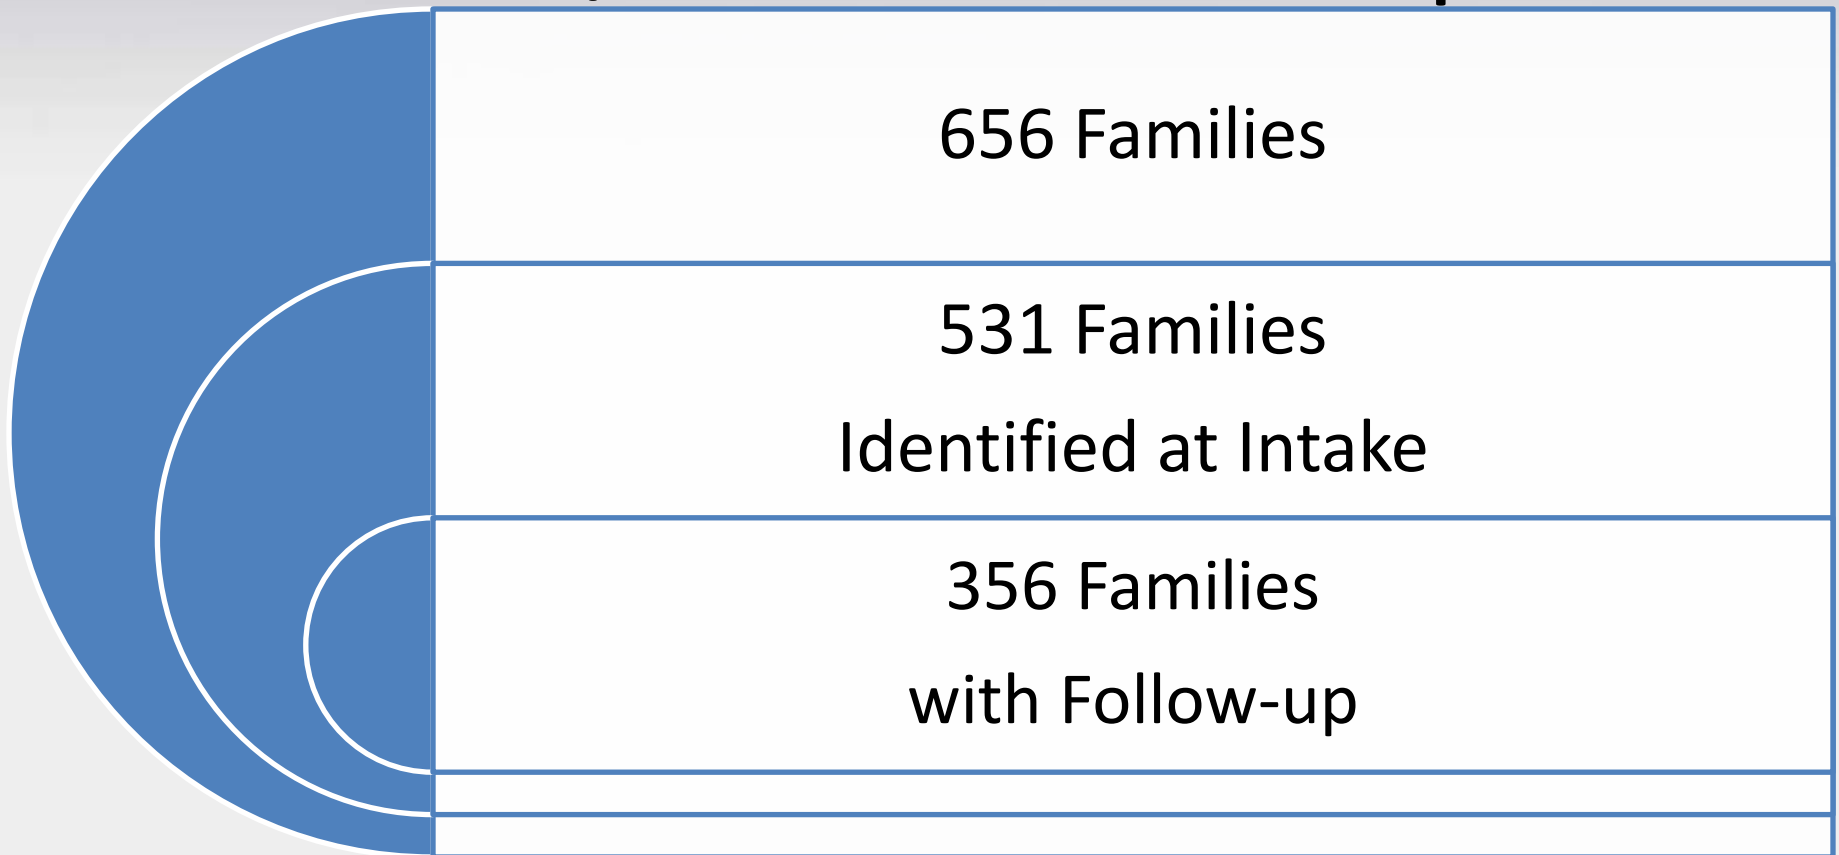

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Connect to child care opportunities	30%
Confirm Safety of Child	25%
Positive parenting education	23%

Example collaborative with 75% improvement in child safety

Intervention	%
Refer to counseling	49%
In-home parent education classes	20%
Refer to PEP classes	14%

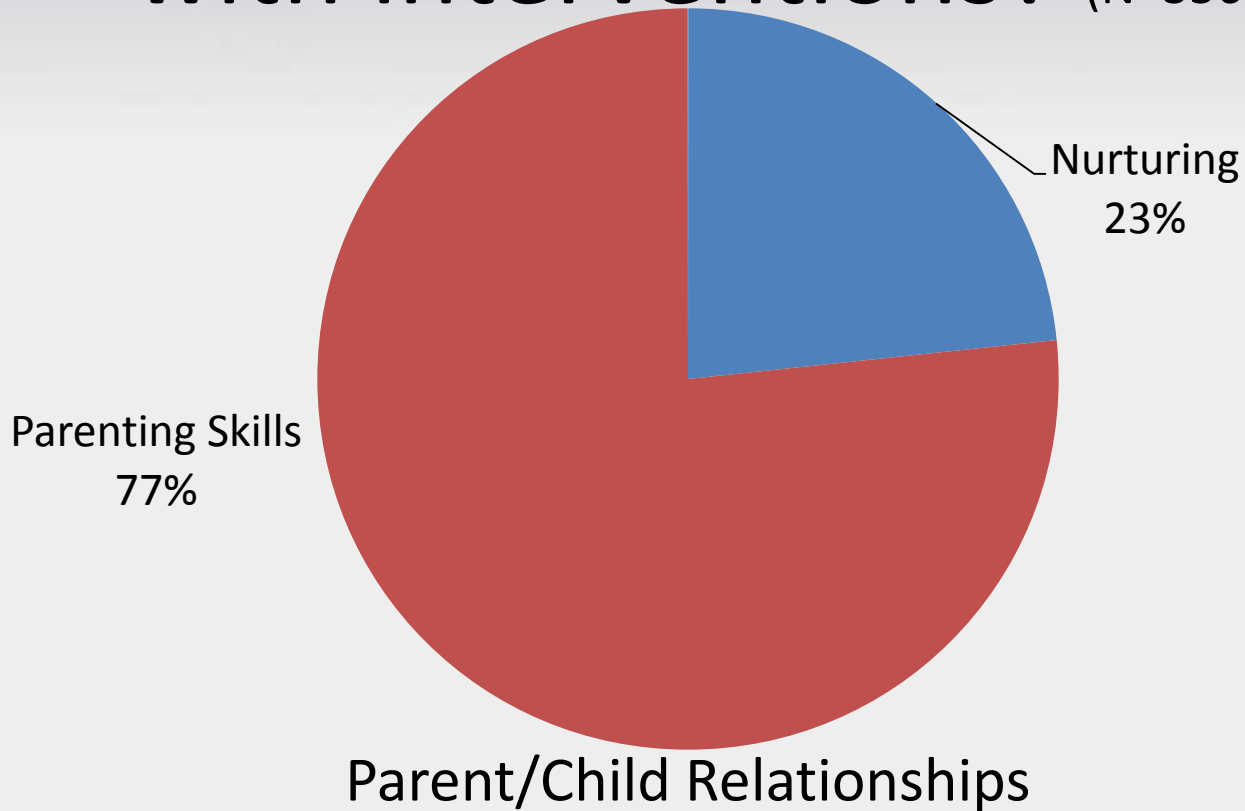

Interventions for Parent/Child Relationships

What was the follow up on these 531 families?

Num of Visits	n	%
1	175	33.0
2	247	46.5
3	74	13.9
4	24	4.5
5	6	1.1
6	4	0.8
7	1	0.2
Total	531	100.0%

What indicators were targeted with interventions? (N=356)

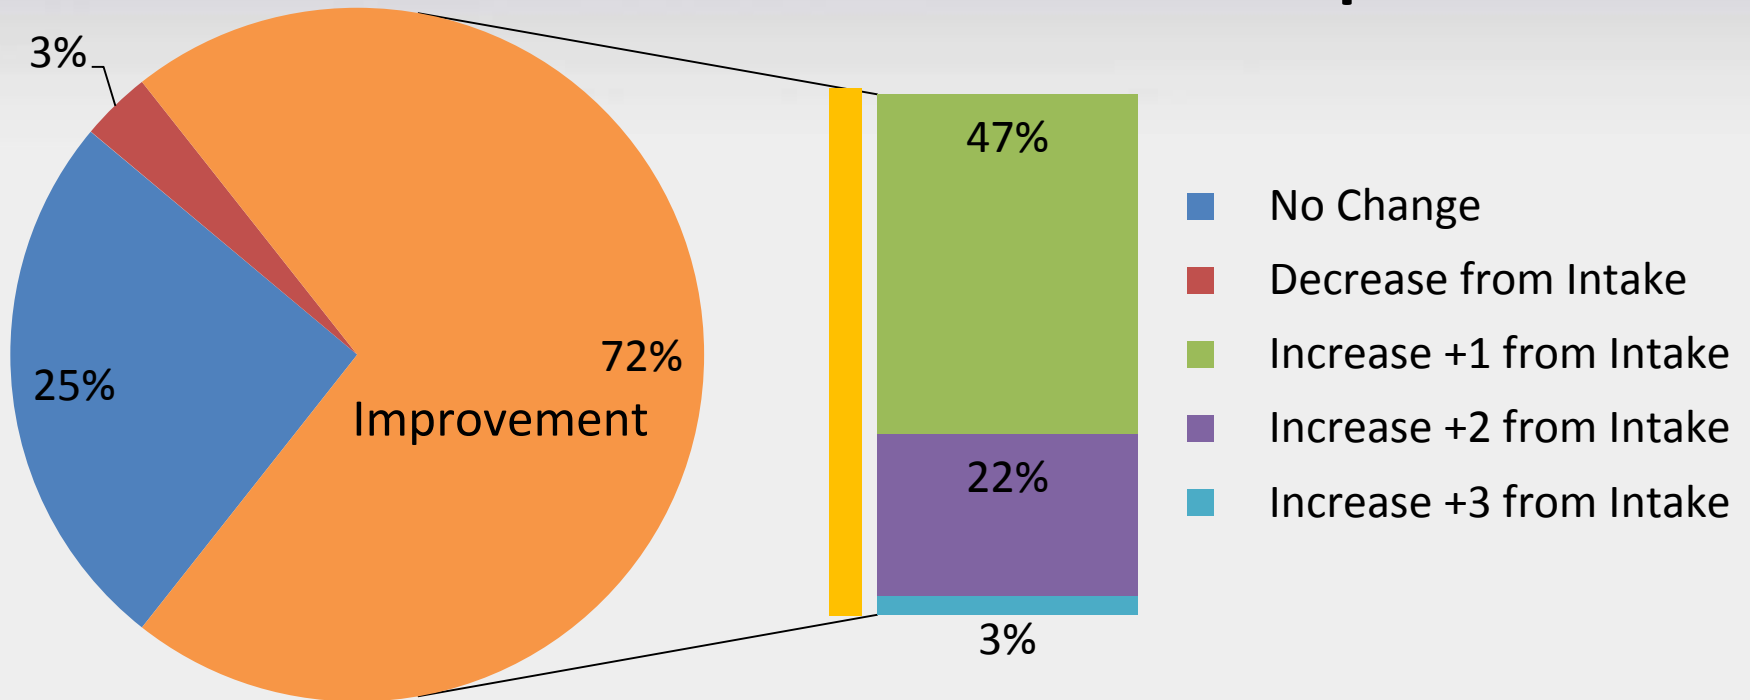

What were the Indicator Scores at Intake?

Intake Score	n	%
1	29	8.1
2	247	69.4
3	68	19.1
4	12	3.4

Parent/Child Relationships

What change was seen from intake to last follow-up?

Parent/Child Relationships
Families who scored 1 or 2 at intake

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Positive parenting education	49%
Connect to parent support groups and education	45%
Identify developmental concerns	14%

Example collaborative with 81% Improvement in Parent/Child Relationships

Intervention	%
Effectively involve fathers and other relatives in parenting	16%

Interventions for Family Communications

- Similar as seen in Parent/Child Relationships
 - number of families analyzed
 - improvement
- 72% of the families showed improvement between intake and last follow-up

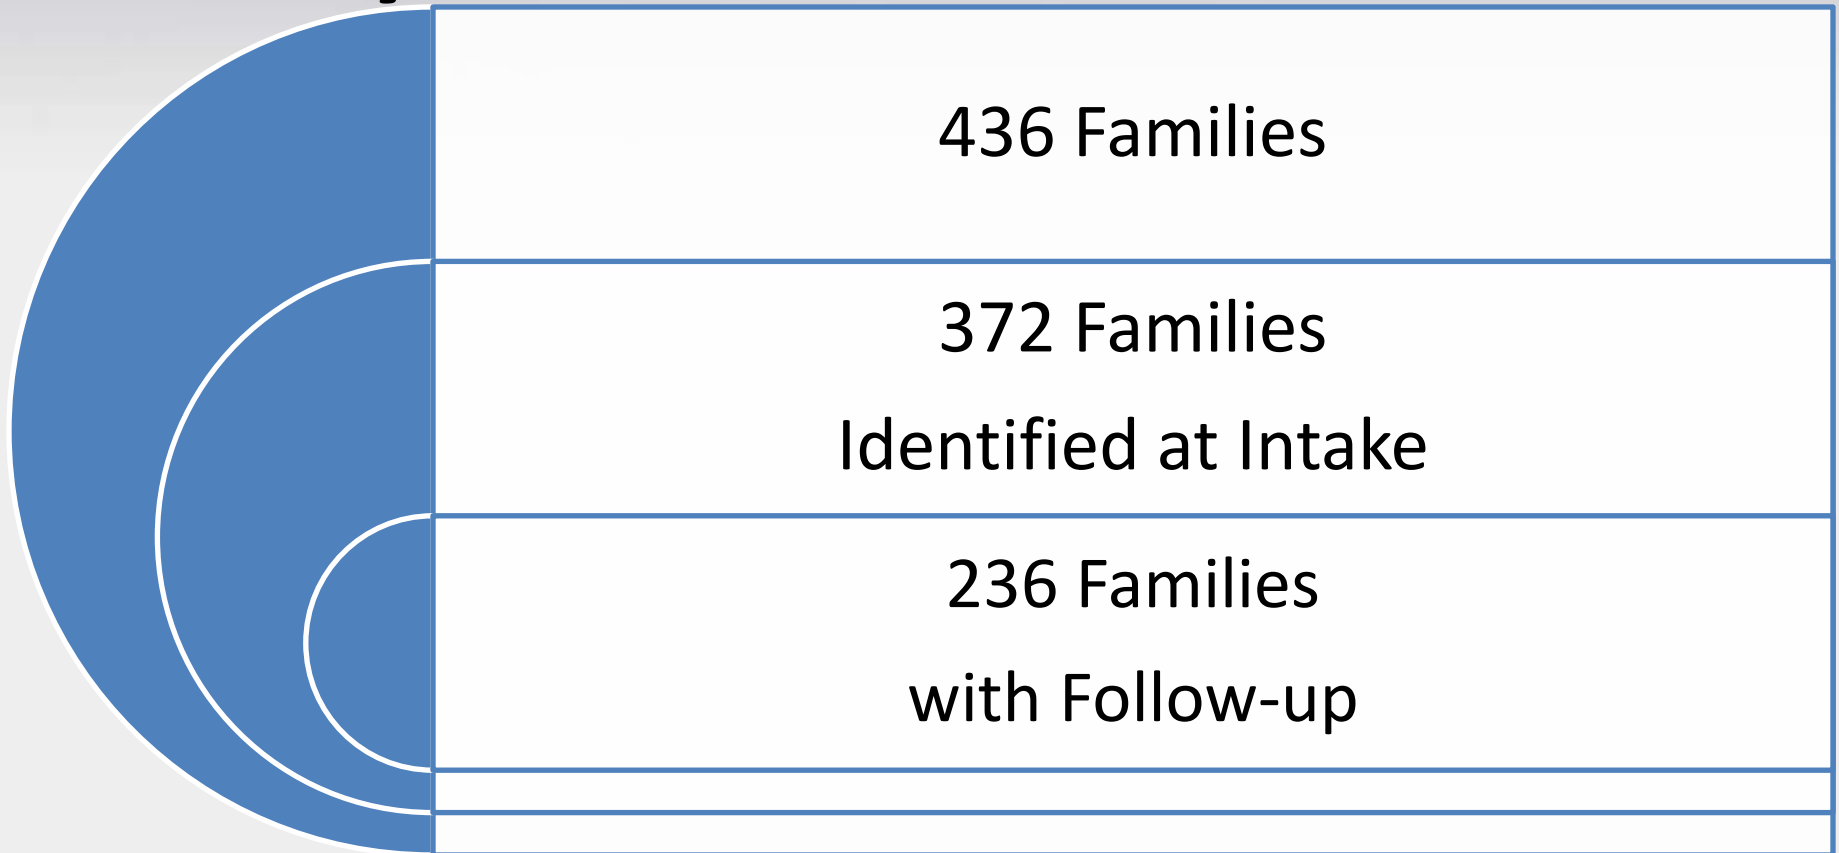

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Connect to parent support groups and education	41%
Positive parenting education	38%
Refer to counseling	23%

Example collaborative with 80% Improvement in Family Communications

Intervention	%
Effectively involve fathers and other relatives in parenting	38%

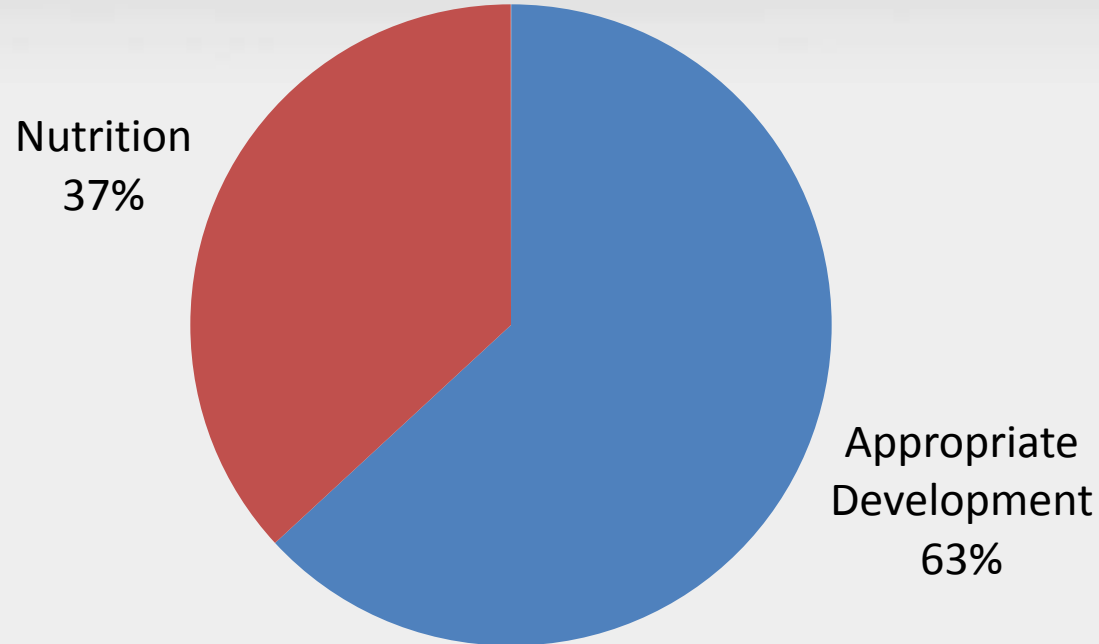

Interventions for **Children's Physical and Mental Health**

What was the follow up on these families?

Num of Visits	n	%
1	136	36.6%
2	169	45.4%
3	46	12.4%
4	15	4.0%
5	4	1.1%
6	2	0.5%
Total	372	100.0%

What indicators were targeted with interventions? (N=236)

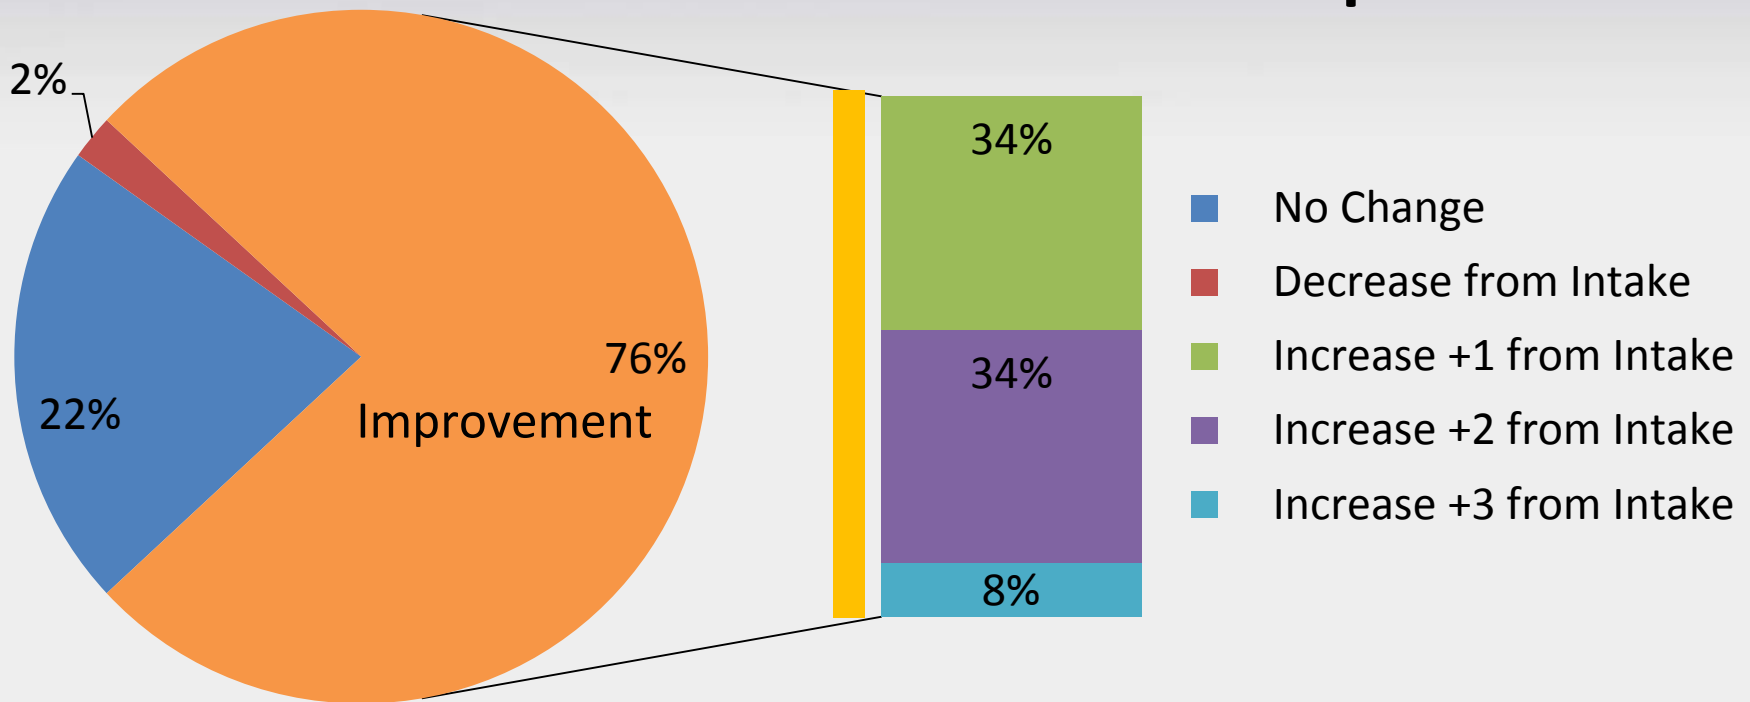

Children's Physical and Mental Health

What were the Indicator Scores at Intake?

Intake Score	n	%
1	29	12.3
2	164	69.5
3	28	11.9
4	15	6.4

Children's Physical and Mental Health

What change was seen from intake to last follow-up?

Children's Physical and Mental Health
Families who scored 1 or 2 at intake

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Identify developmental concerns	43%
Provide health information	22%
Support children's social and emotional competence	21%

Example collaborative with 88% Improvement in Children's Physical/Mental Health

Intervention	%
WIC	61%
Mobile Farmer's Market	50%
County Human Services Agency	39%

Interventions for Social/Emotional Health

- Similar to Children's Physical/Mental Health
 - Number of families
 - % Improvement
- 77% of the families showed improvement between intake and last follow-up

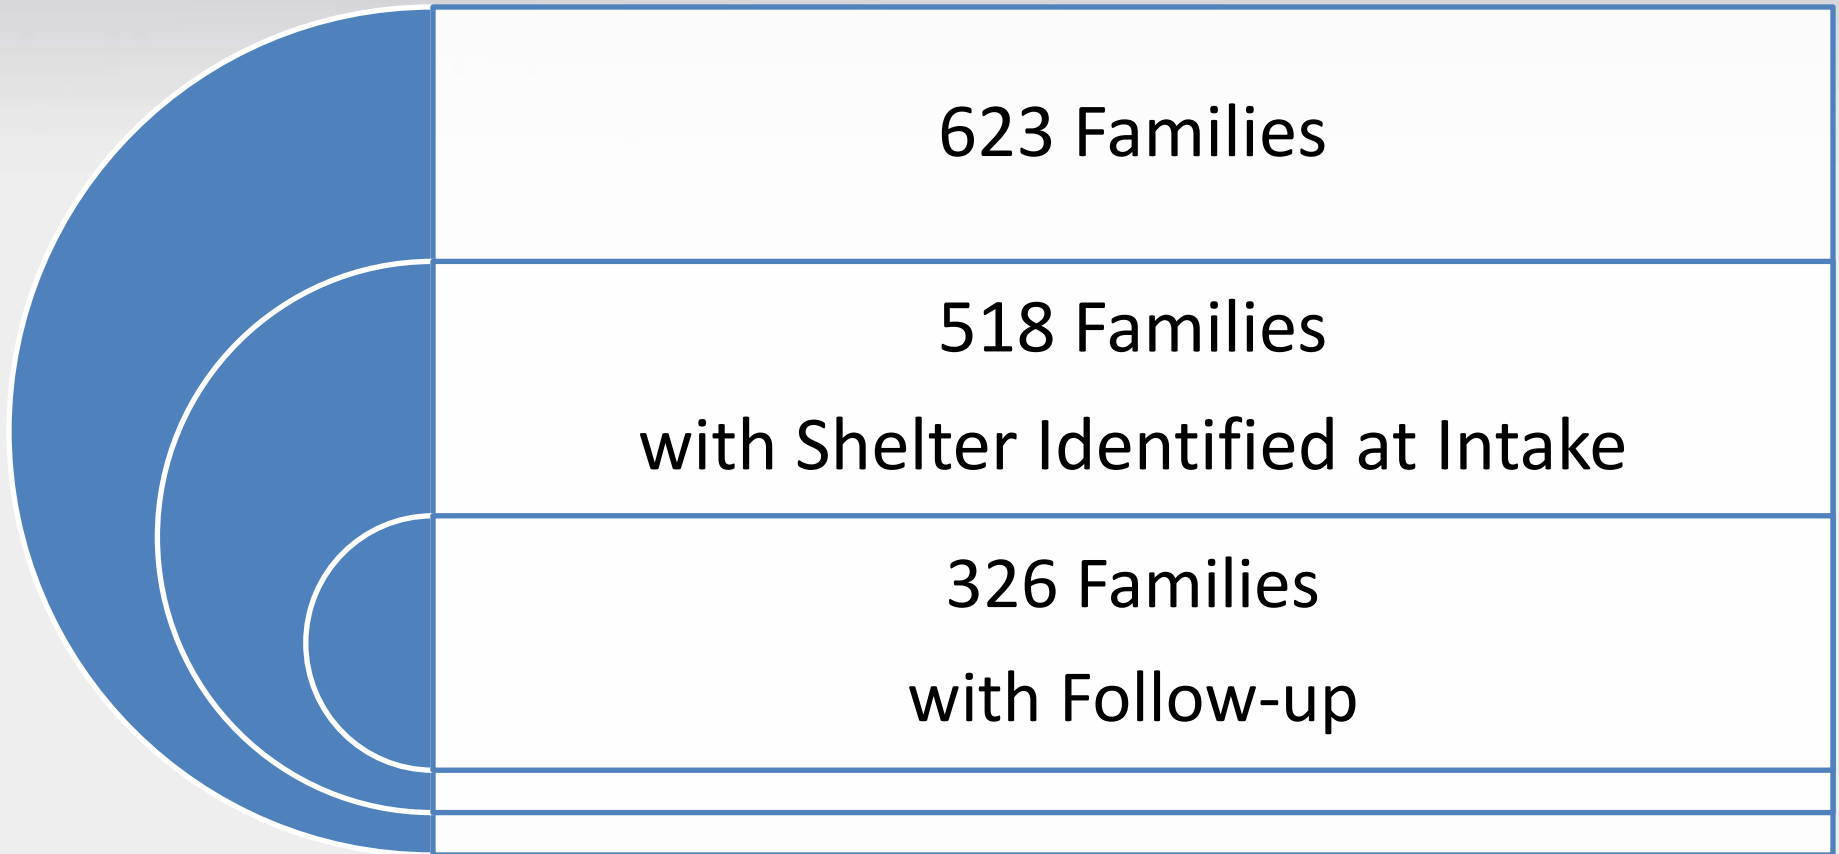

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Connect family to informal community supports	44%
Connect to parent support groups and education	38%
Support family to advocate for child in school	21%

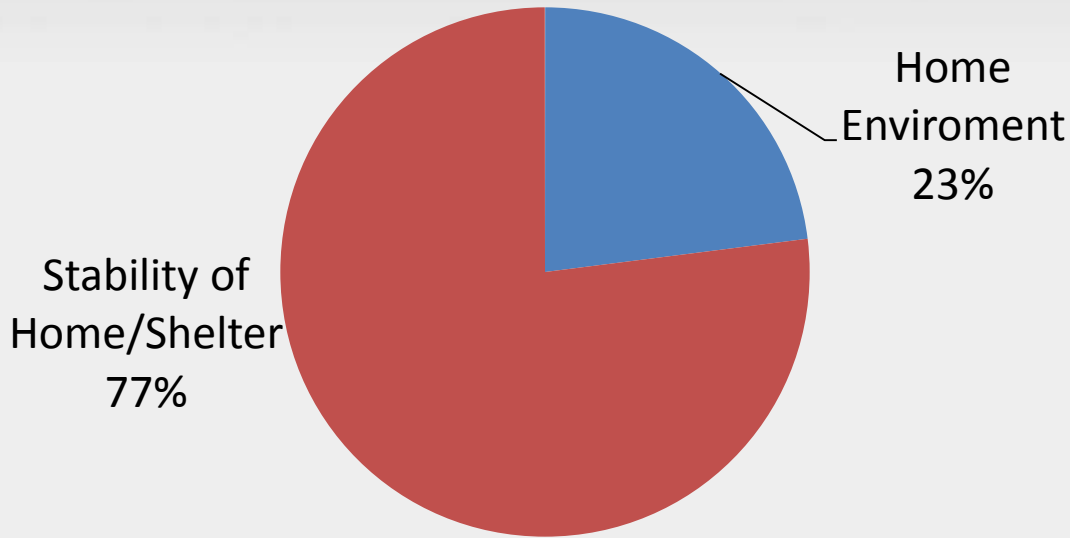

Example collaborative
with 91% Improvement in Social/Emotional Health

Intervention	%
Peer Support groups (Parenting Education and Support)	20%
Family Events (Community Building)	13%
Information and Referral (Access to Resources and Opportunities)	13%

Interventions for Shelter

What indicators were targeted with interventions? (N=326)

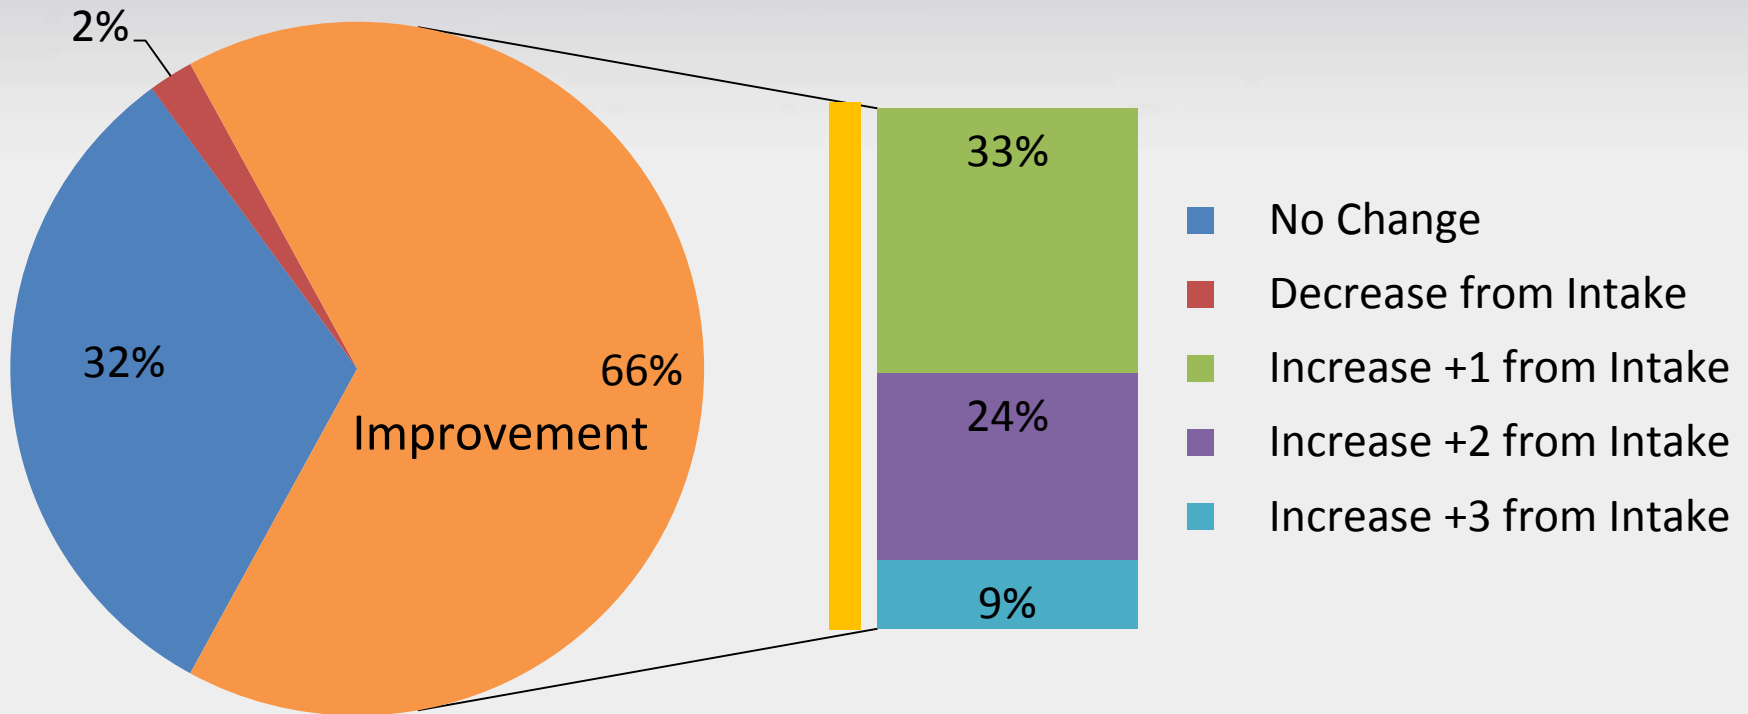

Shelter

What were the indicator scores at intake?

Intake Score	n	%
1	93	28.5
2	148	45.4
3	27	8.3
4	58	17.8

Shelter

What change was seen from intake to last follow-up?

Shelter

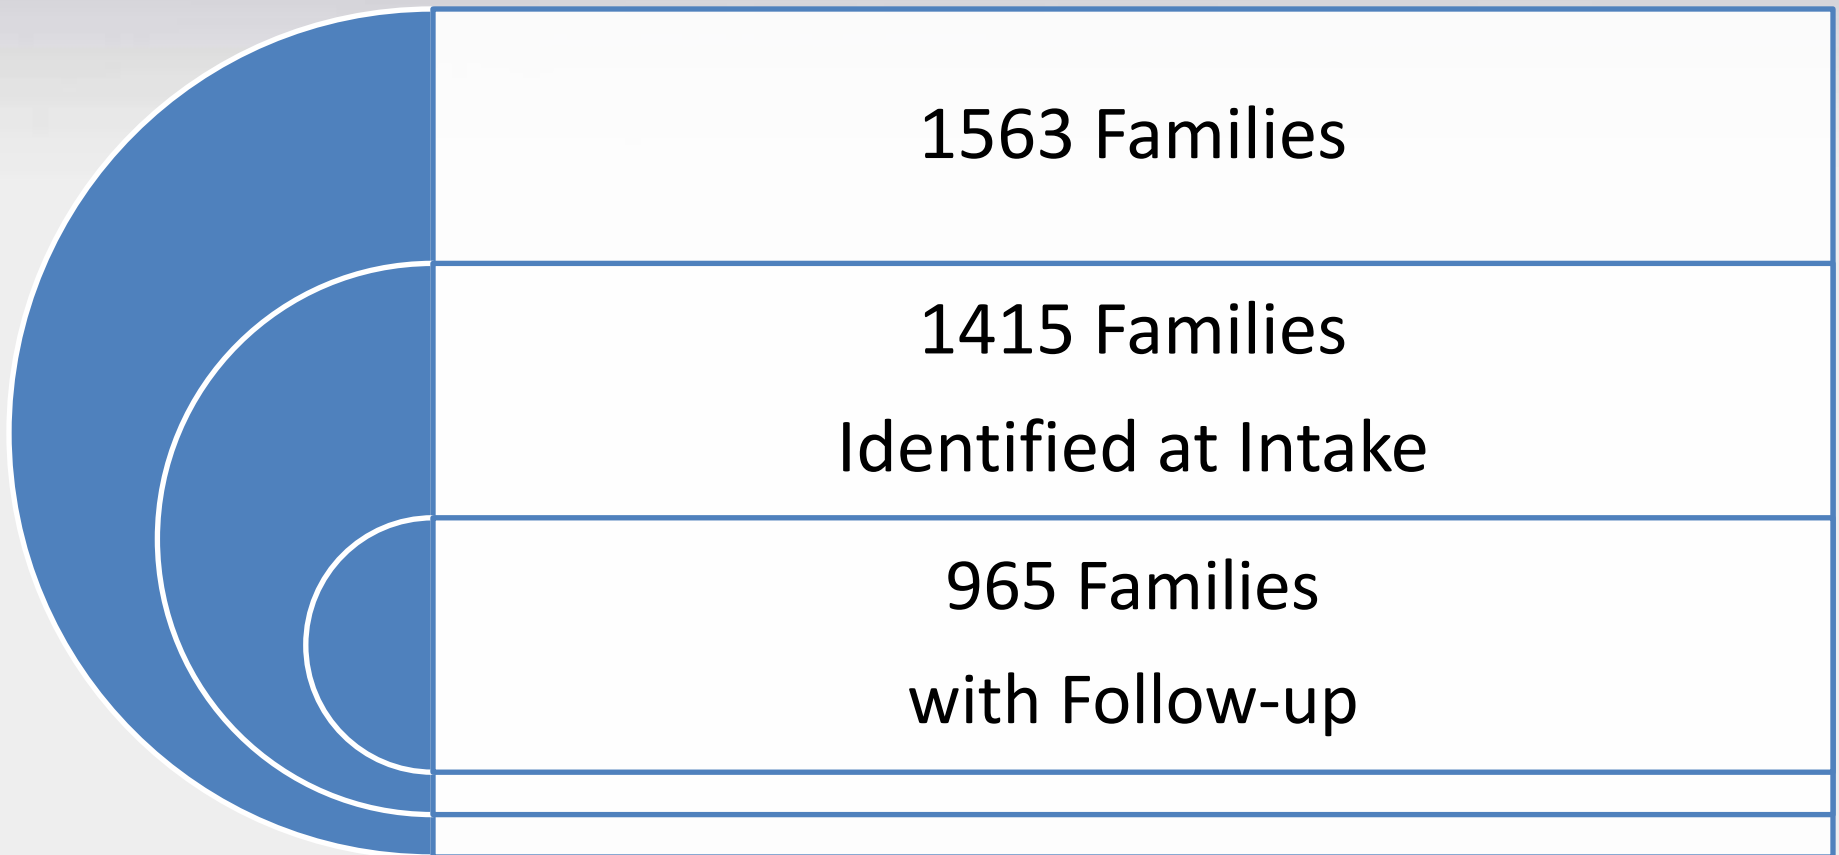

Families who scored 1 or 2 at intake

What were the most prevalent interventions within the improved families?

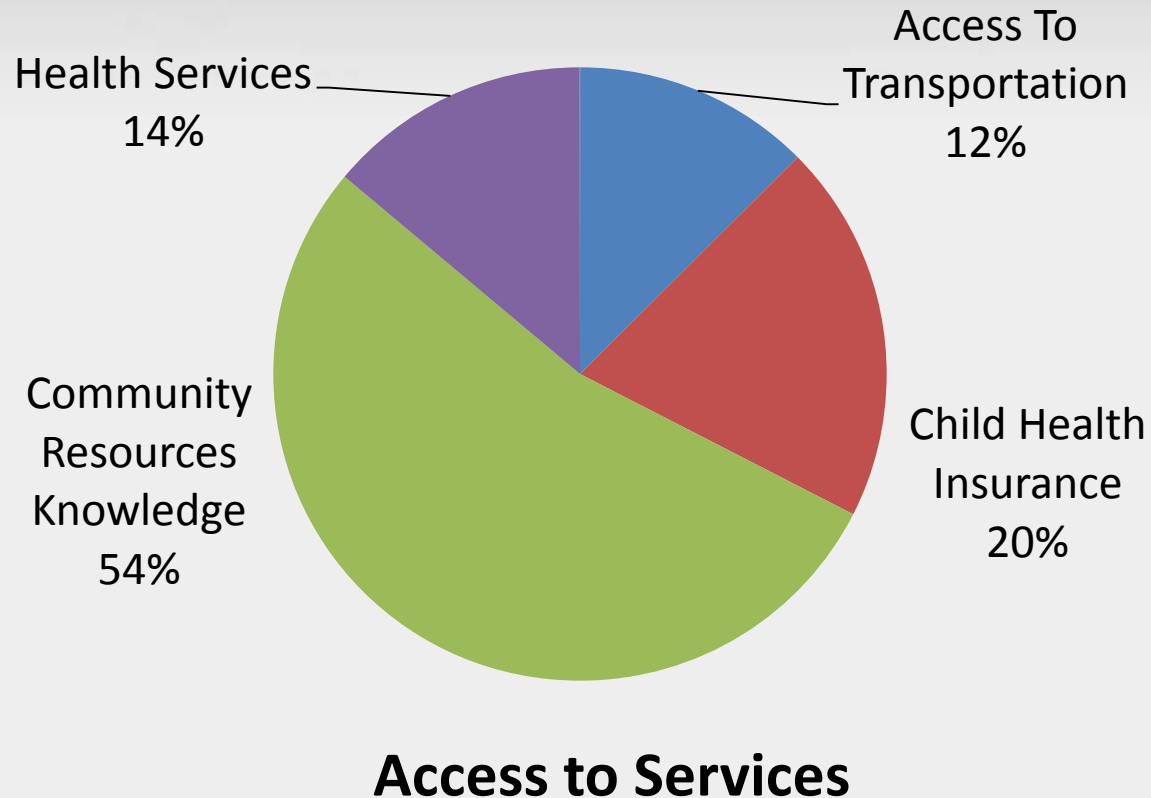

Intervention	% of Improved Families
Connect to financial supports for self sufficiency	49%
Housing/Shelter	13%
Information and Referral (Access to Resources and Opportunities)	8%

Some collaboratives achieved better than 77% improvement in shelter.

Interventions for Access to Services

What indicators were targeted with interventions? (N=965)

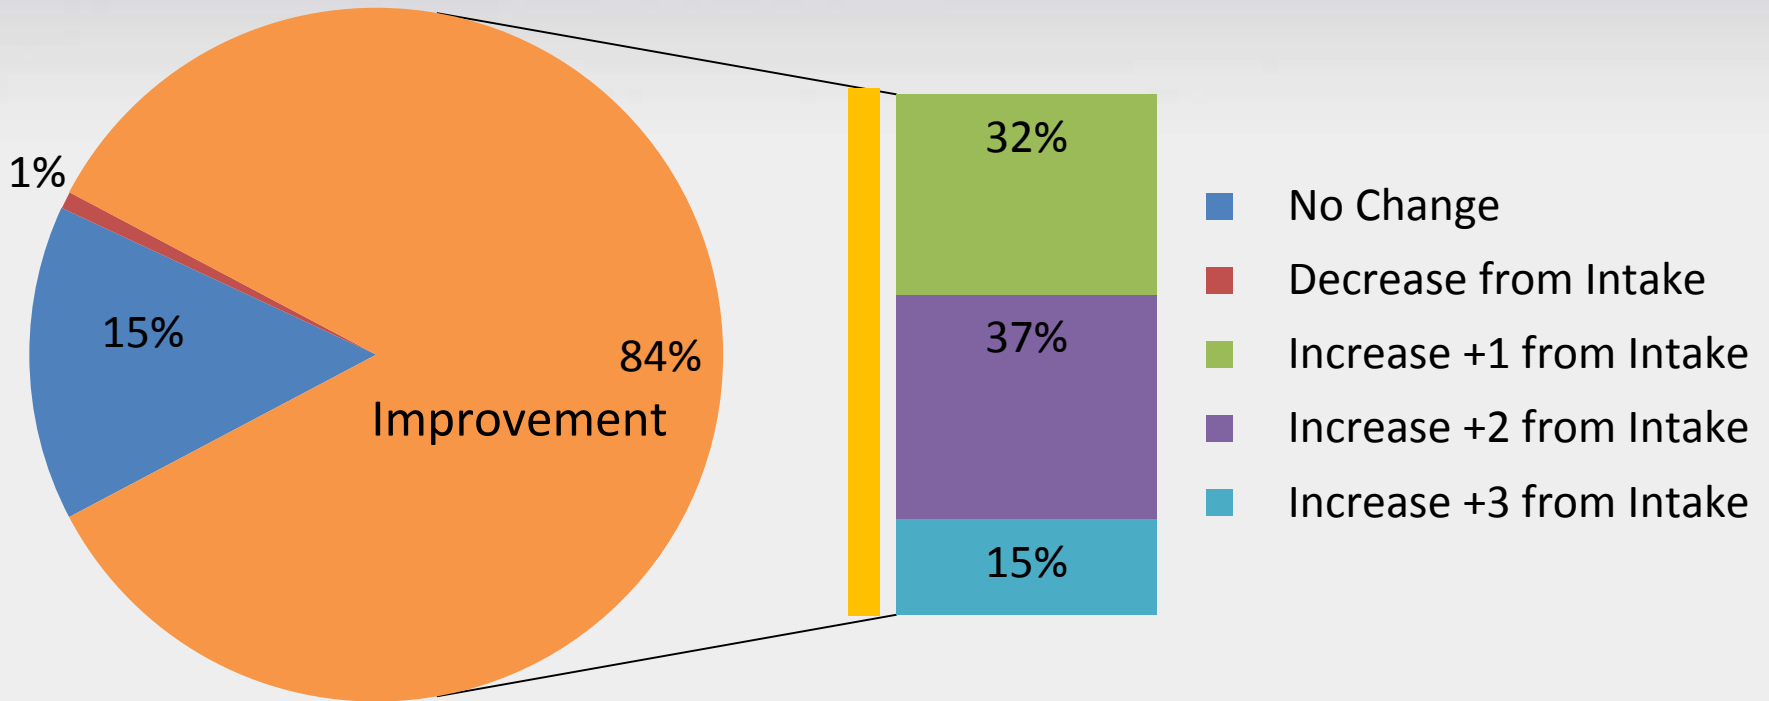

What were the indicator scores at intake?

Intake Score	n	%
1	333	34.5
2	539	55.9
3	73	7.6
4	20	2.1

Access to Services

What change was seen from intake to last follow-up?

Access to Services

Families who scored 1 or 2 at intake

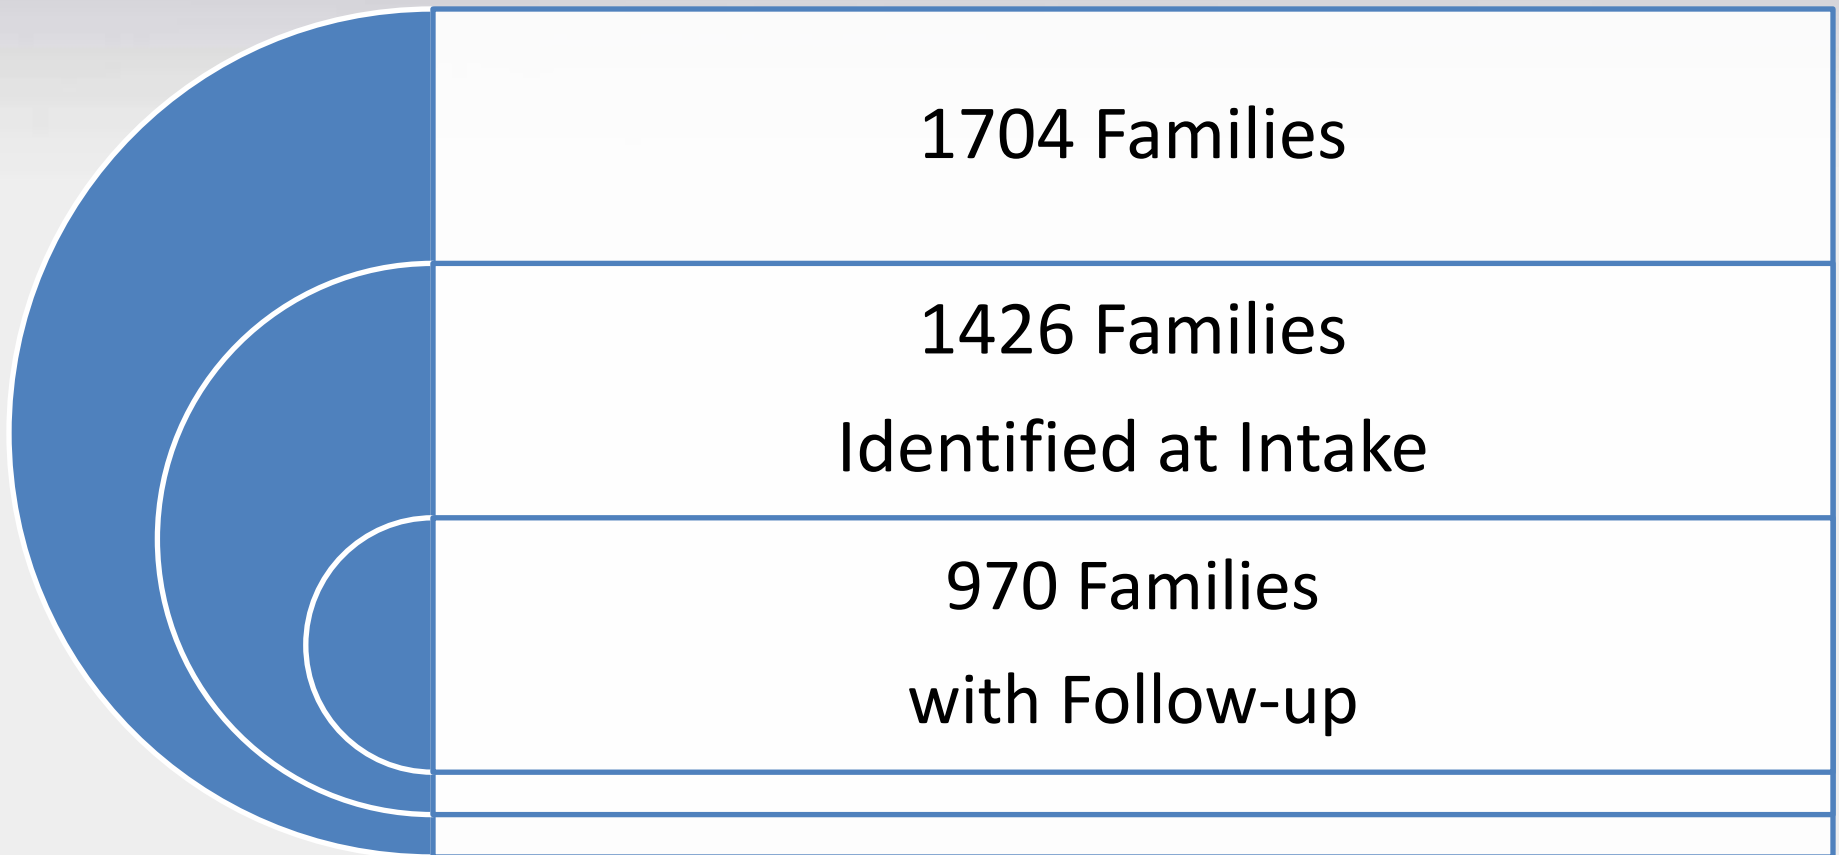

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Provide health information	27%
Work with families to identify system gaps	27%
Participate in Multi-disciplinary teams to coordinate services	23%

Example collaborative with 95% Improvement in Access to Services

Intervention	%
Connect to financial supports for self sufficiency	19%
Provide transportation to access medical & counseling appointments	13%

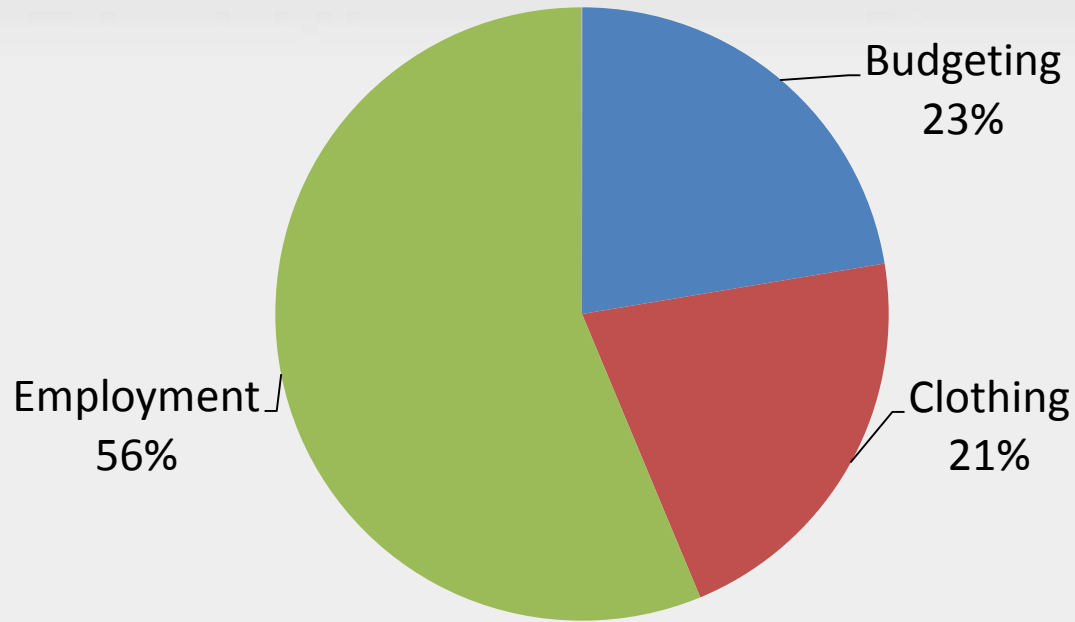

Interventions for Basic Needs

What was the follow up on these families?

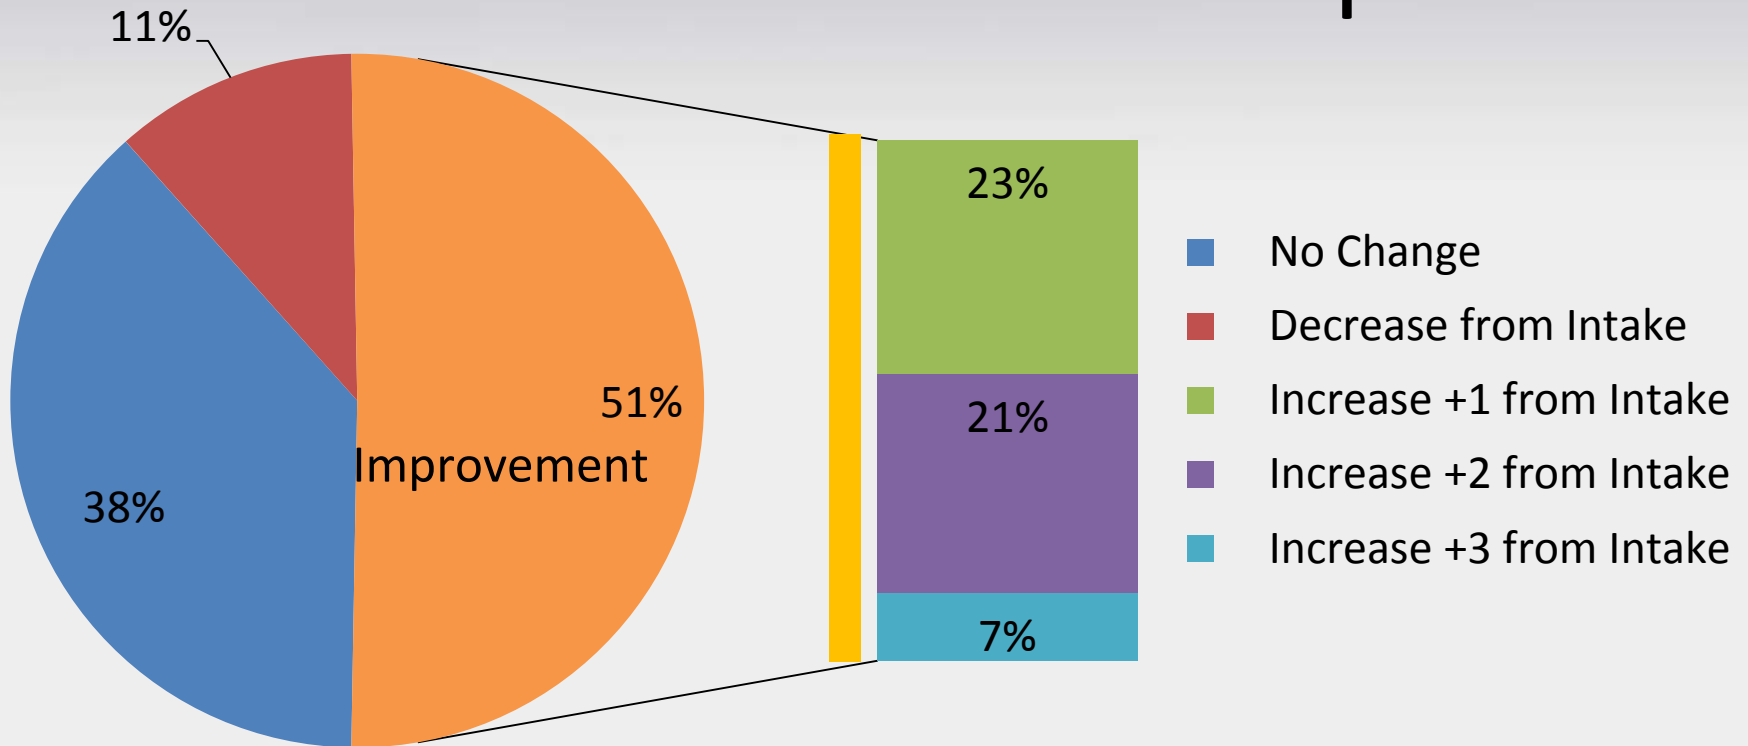

Num of Visits	n	%
1	456	32.0
2	725	50.8
3	186	13.0
4	34	2.4
5	17	1.2
6	6	0.4
7	2	0.1
Total	1426	100.0%

What indicators were targeted with interventions? (N=970)

Basic Needs

What change was seen from intake to last follow-up?

Basic Needs

Families who scored 1 or 2 at intake

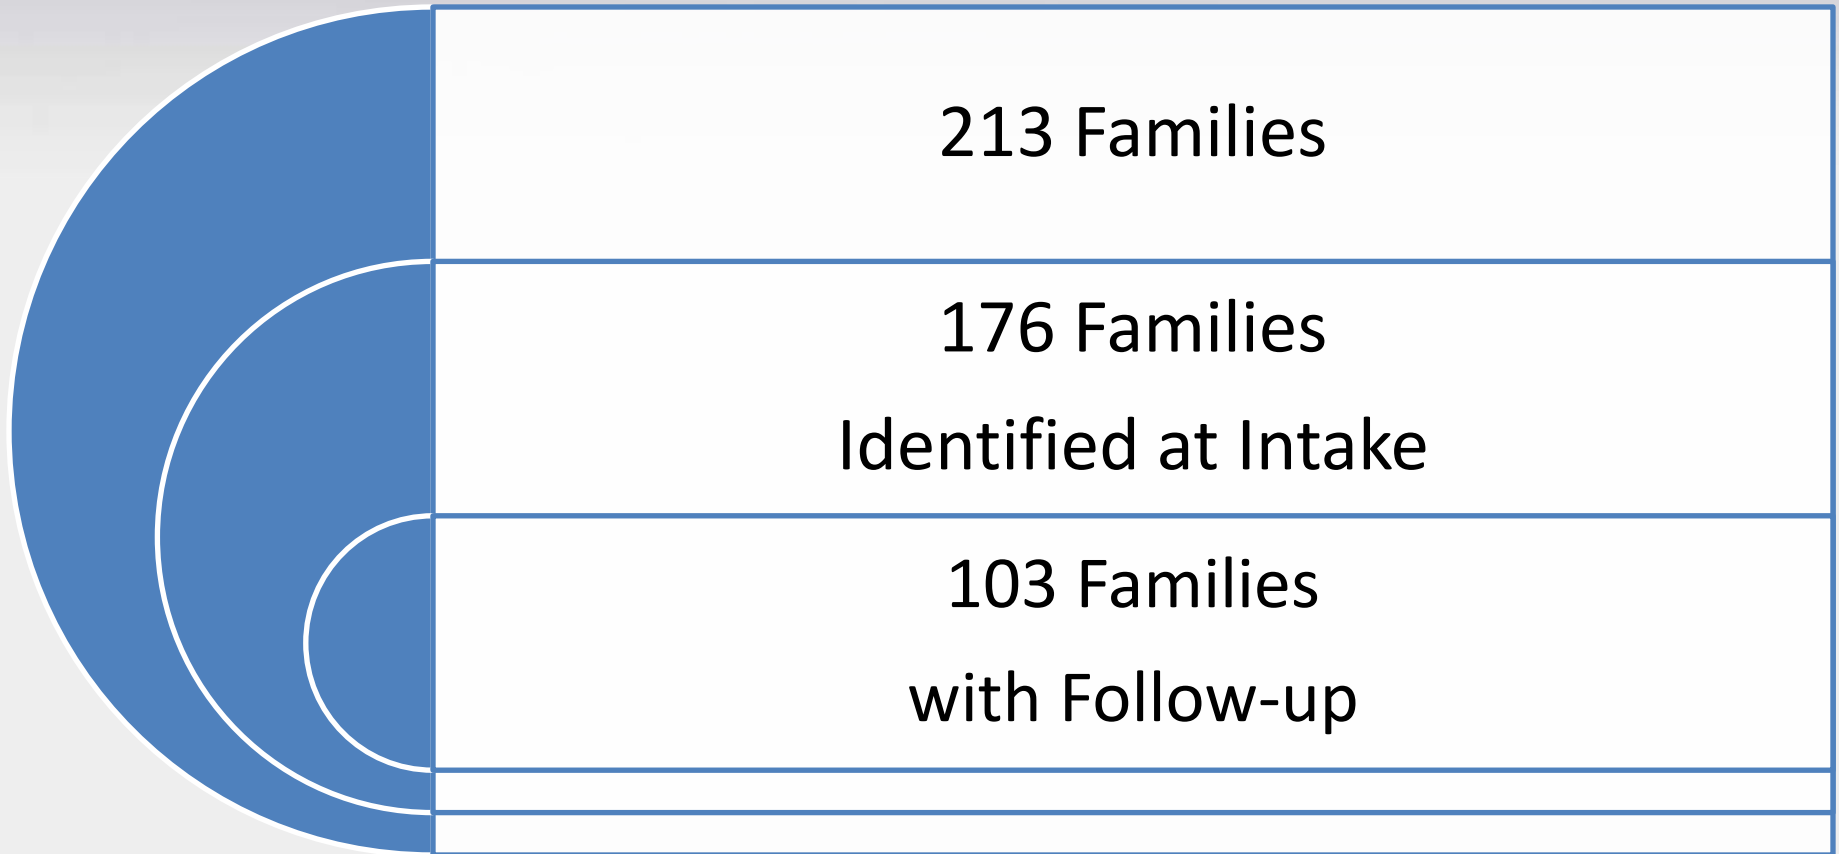

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Connect to financial supports for self sufficiency	51%
Participate in Multi-disciplinary teams to coordinate services	14%
Work in partnership with Child Welfare	9%

Example collaborative with 87% Improvement in Basic Needs

Intervention	%
Link to clothing resources in the community	46%
Connect with Employment office/Employers in the community	31%

Interventions for Substance Abuse

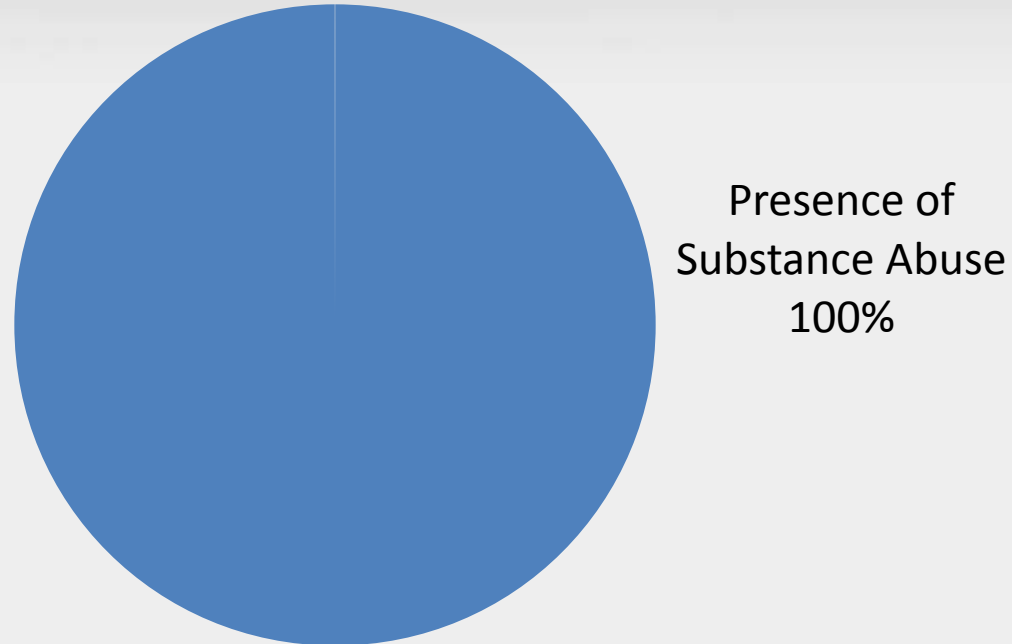

What was the follow up on these families?

Num of Visits	n	%
1	73	41.5
2	86	48.9
3	11	6.3
4	5	2.8
5	0	--
6	1	0.6
Total	176	100.0%

103
families

What indicators were targeted with interventions? (N=103)

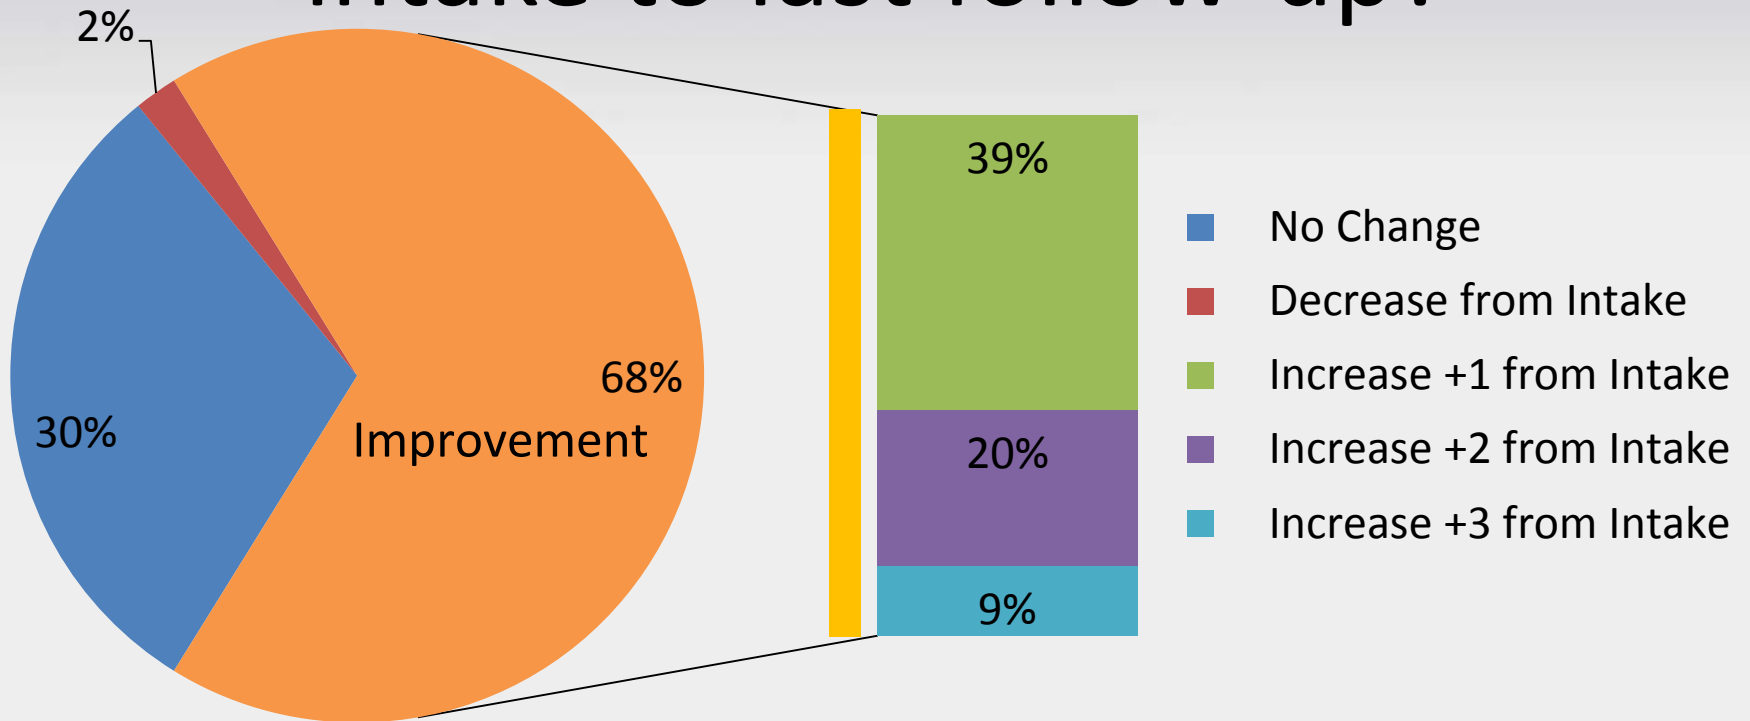

Substance Abuse

What were the Indicator Scores at Intake?

Intake Score	n	%
1	39	37.9
2	60	58.3
3	2	1.9
4	2	1.9

Substance Abuse

What change was seen from intake to last follow-up?

Substance Abuse

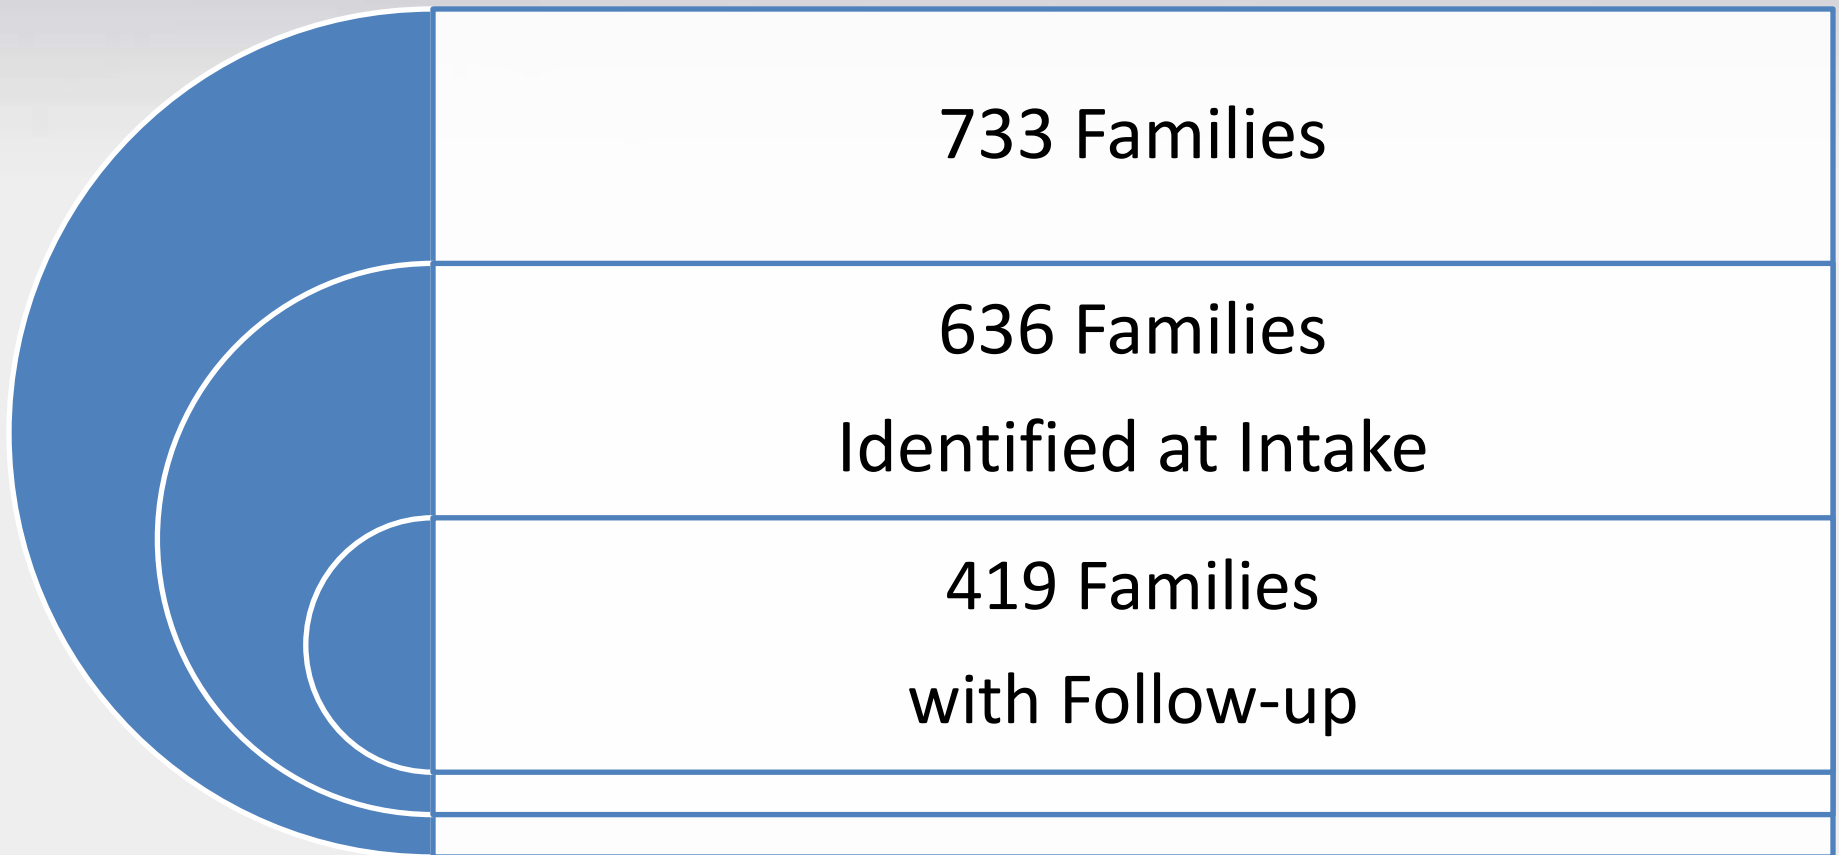

Families who scored 1 or 2 at intake

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Provide linkages to remove barriers to mental health and substance abuse services	49%
Connect to weekly group meetings for parents and children	43%
Provide transportation to access medical & counseling appointments	18%

Example collaborative with 73% Improvement in Substance Abuse
-Used above interventions

Interventions for Life Value

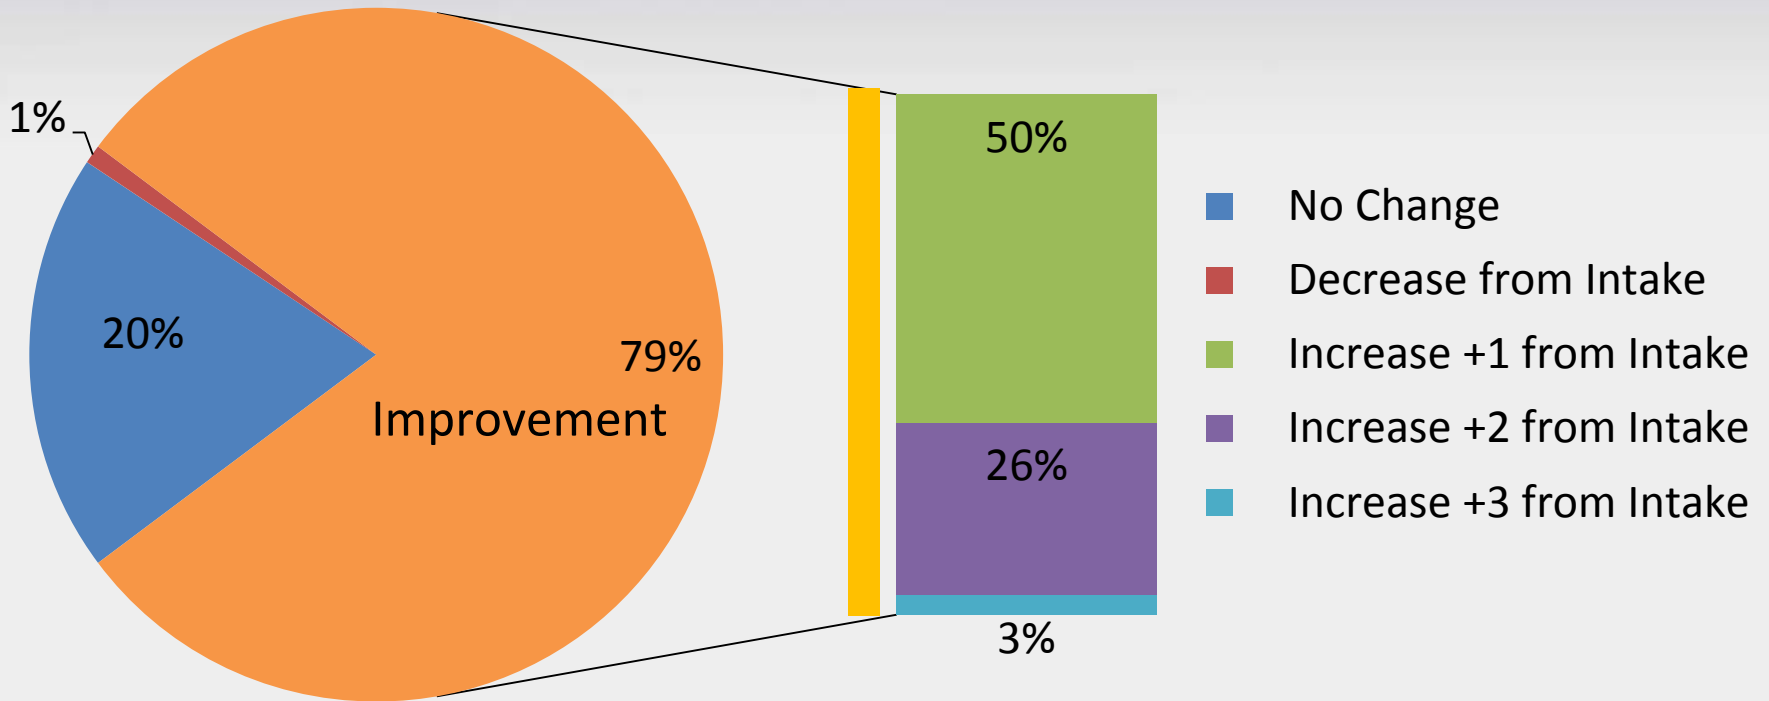

What were the indicator scores at intake?

Intake Score	n	%
1	83	19.8
2	254	60.6
3	81	19.3
4	1	0.2

Life Value

What change was seen from intake to last follow-up?

Life Value

Families who scored 1 or 2 at intake

What were the most prevalent interventions within the improved families?

Intervention	% of Improved Families
Refer to counseling	37%
Connect family to informal community supports	29%
Connect to weekly group meetings for parents and children	24%

Example collaborative with 88% Improvement in Life Value

Intervention	%
Provide linkages to remove barriers to mental health and substance abuse services	57%
Provide transportation to access medical & counseling appointments	14%
