

# The Yurok Tribe

## Tribal Collaborative Prevention Plan

### VISION....VALUE....LEADERSHIP

Our community members will experience success in both worlds through having access to culturally driven tribal intervention services. We believe in respecting our ancestors by bridging the generations to promote ongoing education for building and sustaining traditional family values in a self-sufficient and healthy community. We will do this by maintaining our cultural traditions, practicing spiritually and preserving our language. We will provide knowledge and education to future generations by demonstrating respect for ourselves and others and promoting sobriety, health, and wellness. We will do so with integrity, compassion, and understanding. Taking responsibility for creating, promoting, and supporting safety in communities, and building culturally appropriate programs that foster healthy \_\_\_\_\_ concepts and traditional family values as a means of enhancing protective factors in our households.

#### Overcoming Obstacles and Meeting Challenges

##### Obstacles to Implementation:

- Economic limitations, both within the program and within our families
- Client/Families resistance to change
- Lack of/limited access to community resources

##### Team Approach to Overcome Obstacles:

- Build and sustain traditional family values
- Provide knowledge and education to families
- Provide culturally driven tribal intervention services
- Demonstrate integrity, compassion, and understanding
- Foster healthy self- concept and enhance healthy factors in our households
- Respecting our culture
- Being open to challenges
- Respecting one self and family
- Providing culturally appropriate services
- Access to knowledge and new skills

#### Team Objective and Action Plan

- Support through training and learning from each other (ongoing dialogue)
- Shares with Tribal and administrators our purpose
- An FDM user group to discuss data and protocols

##### Steps:

- Reconvene 6 weeks after "Go Live Date" to evaluate experiences
- Stephanie Wheldon gives orientation practices to Tribal administrations
- Each Program creates annual goals based on prevention plan and create a secure master list of client names and codes
- Debra Herman is \_\_\_\_\_/trainer of FDM data entry and utilization
